Contents of Volume 49

NUMBER 1, AUGUST 1983

F. KANAMARU, S. MIYAZAKI, M. SHIMADA, M. KOIZUMI, K. ODA, AND Y. MIMURA. Preparation, Crystallization, and Magnetic Properties of Amorphous $Fe_{100-x}B_x$ ($18 \leqq x \leqq 42$) 1

JEAN-CLAUDE JUMAS, JOSETTE OLIVIER-FOURCADE, ETIENNE PHILIPPOT, ET MAURICE MAURIN. Etude Mössbauer de ^{121}Sb dans quelques thioantimonates de lithium 6

J. R. GAVARRI ET A. W. HEWAT. Les antimonites antiferromagnetiques $MnSb_2O_4$ et $NiSb_2O_4$ 14

Y. Q. YANG, P. H. KEESOM, J. K. FURDYNA, AND W. GIRIAT. Magnetic Susceptibility and the Spin-Glass Transition of $Cd_{1-x}Mn_xS$ and $Zn_{1-x}Mn_xS$ at Low Temperatures 20

P. L. GAI. Microstructure and Microanalysis of Bismuth Molybdates 25

J. V. MARZIK, A. K. HSIEH, K. DWIGHT, AND A. WOLD. Photoelectronic Properties of Cu_3PS_4 and Cu_3PS_3Se Single Crystals 43

K. S. NANJUNDASWAMY AND J. GOPALAKRISHNAN. Preparation, Structure, and Magnetic Properties of Isostructural La_3MAlS_7 and La_3MFeS_7 (M = Mg, Mn, Fe, Co, Ni, or Zn) 51

G. D. FALLON AND B. M. GATEHOUSE. The Crystal Structure of $Ba_2Ti_9O_{20}$: A Hollandite Related Compound 59

NOBORU KIMIZUKA, AKIJI YAMAMOTO, HARUO OHASHI, TADASHI SUGIHARA, AND TOSHIMORI SEKINE. The Stability of the Phases in the Ln_2O_3–FeO–Fe_2O_3 Systems Which Are Stable at Elevated Temperatures (*Ln:* Lanthanide Elements and Y) 65

MARIE-ANNE BUHANNIC, ANTOINE AHOUANDJINOU, MICHEL DANOT, ET JEAN ROUXEL. Double coordinence du fer dans la phase Fe_xZrSe_2 ($0 < x < 0{,}25$): propriétés magnétiques et caractéristiques Mössbauer 77

EMIL MAKOVICKY. The Phase Transformations and Thermal Expansion of the Solid Electrolyte Cu_3BiS_3 between 25 and 300°C 85

V. A. M. BRABERS, F. M. VAN SETTEN, AND P. S. A. KNAPEN. X-Ray Photoelectron Spectroscopy Study of the Cation Valencies in Nickel Manganite 93

JEAN SENEGAS, C. CHARTIER, ET J. GRANNEC. Etude par resonance magnétique des phénomènes diffusifs dans les phases du systeme NaF–BiF_3 99

D. DOHY ET J. R. GAVARRI. Oxyde β-Ga_2O_3: Champ de force, dilatation thermique, et rigidité anisotropes 107

ANDERS HÅRSTA, STIG RUNDQVIST, AND JOHN O. THOMAS. A Neutron Powder Diffraction Study of the κ Phase in the Fe–W–C System 118

BRIEF COMMUNICATIONS

P. JERNBERG AND R. WÄPPLING. A Mössbauer Study of the κ Phase in the Fe–W–C System 123

G. BLASSE AND G. BOKKERS. Low-Temperature Decay-Time Measurements on the Luminescence of Calcium Tungstate ($CaWO_4$) 126

NUMBER 2, SEPTEMBER 1983

I. S. VINOGRADOVA. Deuteron Magnetic Resonance Study of Single Crystals of $NaDSeO_3$ 129
C. SOURISSEAU, J. P. FORGERIT, AND Y. MATHEY. Vibrational Study of the $[P_2S_6^{4-}]$ Anion, of Some MPS_3 Layered Compounds (M = Fe, Co, Ni, $In_{2/3}$), and of Their Intercalates with $[Co(\eta^5\text{-}C_5H_5)_2^+]$ Cations 134
C. MICHEL AND B. RAVEAU. Ln_2BaZnO_5 and $Ln_2BaZn_{1-x}Cu_xO_5$: A Series of Zinc Oxides with Zinc in a Pyramidal Coordination 150
W. HÖNLE, H. D. FLACK, AND K. YVON. Single Crystal X-Ray Study of Mo_6Se_8-Type Selenides Containing Partially Substituted $(Mo,Me)_6$ Clusters (Me = Ru,Re) 157
J. BAGLIO, E. KAMIENIECKI, N. DECOLA, C. STRUCK, J. MARZIK, K. DWIGHT, AND A. WOLD. Growth and Characterization of n-WS_2 and Niobium-Doped p-WS_2 Single Crystals 166
F. LAVILLE, D. GOURIER, A. M. LEJUS, AND D. VIVIEN. Optical and ESR Investigations of Lanthanum Aluminates $LaMg_{1-x}Mn_xAl_{11}O_{19}$ Single Crystals with Magnetoplumbite-like Structure 180
MANUEL SIESKIND ET MOHAMED AYADI. Energie de cohésion des composés MAX ($M \equiv$ Ca,Sr,Ba; $A \equiv$ H,F; $X \equiv$ Cl,Br,I) de structure PbFCl 188
W. E. WAHNSIEDLER. Energy Band Structure and Electronic Transport Properties of Niobium Monoxide 195
H. F. FRANZEN, R. T. TUENGE, AND L. EYRING. Vacancy Ordering in $Sc_{1-x}S$ ... 206
Y. NODA, M. SHIMADA, AND M. KOIZUMI. High-Pressure Synthesis and Magnetic Properties of the Solid Solution $MnCr_xSb$ and $CrMn_ySb$ ($0 \leqq x, y \leqq 1.0$) 215
M. A. ALARIO-FRANCO, J. M. GONZALEZ-CALBET, M. VALLET-REGI, AND J. C. GRENIER. Brownmillerite-Type Microdomains in the Calcium Lanthanum Ferrites: $Ca_xLa_{1-x}FeO_{3-y}$. I. $\frac{2}{3} < x < 1$ 219
T. ISHIGURO, N. ISHIZAWA, N. MIZUTANI, AND M. KATO. A New Delafossite-Type Compound $CuYO_2$. I. Synthesis and Characterization 232
J. P. LAVAL AND B. FRIT. Defect Structure of Anion-Excess Fluorite-Related $Ca_{1-x}Y_xF_{2+x}$ Solid Solutions 237
B. T. CHANG, G. CAMPET, J. CLAVERIE, P. HAGENMULLER, AND J. B. GOODENOUGH. Sensitization of Polycrystalline $SrTiO_3$ Photoanodes by Mechanical Polishing 247

BRIEF COMMUNICATIONS
K. TENNAKONE. Semiconduction in Silver Orthoarsenate 256
MAHADEVA NATARAJAN, JOHN QUINN, AND ETALO A. SECCO. Infrared Spectra of Cs_3CoCl_5 258

NUMBER 3, OCTOBER 1983

HARRY NYMAN. A Relation between the Structures of $Ce_{24}Co_{11}$, Ru_7B_3, and Pyrochlore 263
D. COLAITIS, D. VAN DYCK, P. DELAVIGNETTE, AND S. AMELINCKX. Long Period Superstructures in Cu Intercalated VS_2: $Cu_{0.75}VS_2$ 269

RAGNAR LARSSON. On the Polarity of Transition Metal Pyrites 285
W. A. ENGLAND, J. B. GOODENOUGH, AND P. J. WISEMAN. Ion-Exchange Reactions of Mixed Oxides 289
W. A. ENGLAND, J. E. BIRKETT, J. B. GOODENOUGH, AND P. J. WISEMAN. Ion Exchange in the $Cs_x[Ti_{2-\frac{x}{2}}Mg_{\frac{x}{2}}]O_4$ Structure 300
ANNA ANICHINI, PIERO PORTA, MARIO VALIGI, AND IRMA L. BOTTO. The Incorporation and the Reducibility of Ni^{2+} in $MgTiO_3$ 309
R. GEHLIG, E. SALJE, A. F. CARLEY, AND M. W. ROBERTS. XPS Studies on $WO_{2.90}$ and $WO_{2.72}$ and the Influence of Metallic Impurities 318
C. GREAVES. A Powder Neutron Diffraction Investigation of Vacancy Ordering and Covalence in γ-Fe_2O_3 325
S. E. P. DOWKER AND J. C. ELLIOTT. Infrared Study of the Formation, Loss, and Location of Cyanate and Cyanamide in Thermally Treated Apatites 334
M. T. AVERBUCH-POUCHOT AND A. DURIF. Crystal Chemistry of $M^{II}Ag(PO_3)_3$ Polyphosphates for M^{II} = Zn, Co, Ni, Mg and $M^{II}_4Na_4(P_4O_{12})_3$ Tetrametaphosphates for M^{II} = Zn, Co, Ni: Crystal Structures of $ZnAg(PO_3)_3$ and $Zn_4Na_4(P_4O_{12})_3$ .. 341

EWA K. HODOROWICZ, STANISLAW A. HODOROWICZ, AND HARRY A. EICK. Preparatory and X-Ray Diffraction Study of the $EuCl_2$–$EuBr_2$ System 362
M. T. AVERBUCH-POUCHOT. Crystal Chemistry of Some Addition Compounds of Alkali Iodates with Telluric Acid 368
SHARON M. BOUDREAU, ROBERT A. BOUDREAU, AND HELMUT M. HAENDLER. The Crystal and Molecular Structure of Bis(*ortho*-aminobenzoato)zinc(II), $Zn(H_2NC_6H_4COO)_2$ 379

BRIEF COMMUNICATIONS
V. R. PAI VERNEKER AND R. VASANTHAKUMARI. Crystal Structure Transformation in Potassium Acrylate 385
T. J. BASTOW, B. D. JAMES, AND M. B. MILLIKAN. An Unexpected Double Salt Structure in Pyridinium Enneachlorodithallate(III) 388
M. RZAIGUI AND N. K. ARIGUIB. Preparation and Characterization of Some Crystalline Condensed Cerium–Ammonium Phosphates 391

AUTHOR INDEX FOR VOLUME 49 399

The Subject Index for Volume 49 will appear in the December 1983 issue as part of a cumulative index for the year 1983.

Information for Authors

The *Journal of Solid State Chemistry* is a research journal devoted to the chemical, structural, thermodynamic, electronic, magnetic, and optical properties and processes of solids. Theoretical and experimental contributions are both welcome. Critical reviews are occasionally presented in selected rapidly developing fields.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Solid State Chemistry* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Manuscripts may be presented as articles (i.e., conventional full-length expositions) or notes (brief rapid communications of important new work). Notes are limited to 1200 words and are given accelerated review and publication. English, French, and German are the official languages of the Journal but submission of articles in English is encouraged. Manuscripts should be submitted to *Journal of Solid State Chemistry*, Editorial Office, Seventh Floor, 1250 Sixth Avenue, San Diego, California 92101.

Manuscripts should be submitted in triplicate—double-spaced on one side of 21.5 × 28 cm paper. Headings of major sections should be typed in capital letters and centered on the page. Each page of the manuscript should be numbered. Page one should consist of the manuscript title, the author's name, and the author's affiliation. For multiple authors, the author to whom correspondence is to be addressed should be indicated. Page two should consist of an abstract (50–150 words) suitable for use in *Chemical Abstracts*. The American Chemical Society's *Handbook for Authors* or the *Style Manual* of the American Institute of Physics should be followed regarding matters of style and abbreviation.

Tables. Tables should be numbered with Roman numerals in a sequence corresponding to the order of citation in the text. Footnotes to tables are to be placed directly below the table and should be indicated by superscript, lower-case italic letters (^{a,b,c}). Tables longer than two manuscript pages should be submitted as clear, sharp glossy photographs. They will be reproduced by photoengraving and should be designed to fit the Journal page after 50% reduction in each dimension. Errors in such tables cannot be corrected in proof.

Auxiliary Material. In lieu of publication, unusually long tables and sequences of repetitive figures must be deposited with the National Auxiliary Publications Service (NAPS). In particular, structure factor tables must be deposited if, in a clear, proportional, photoreduced format, they would occupy more than one Journal page (this corresponds to a limit of about 1000 F_o and F_c).

For material to be deposited, a deposit fee of $25.00 for up to 98 pages of standard-size or 49 pages of oversize deposited material is to be paid by the authors to NAPS. Appropriate transmittal forms to accompany the deposited material are supplied to the authors by the Editor at the time a paper is accepted for publication. The following footnote (wherein missing numbers are to be inserted by the author in page proof) should be used to reference deposited material.

See NAPS document No. ____ for ____ pages of supplementary material. Order from ASIS/NAPS. Microfiche Publications, P.O. Box 3513, Grand Central Station, New York, NY 10163. Remit in advance $4.00 for microfiche copy or for photocopy, $7.75 up to 20 pages plus $.30 for each additional page. All orders must be prepaid. Institutions and Organizations may order by purchase order. However, there is a billing and handling charge for this service of $15. Foreign orders add $4.50 for postage and handling, for the first 20 pages, and $1.00 for additional 10 pages of material, $1.50 for postage of any microfiche orders.

Figures. Figures should be submitted as glossy prints or as original black ink drawings, no larger than 21.5 × 28 cm. Press type is not acceptable. It is important that lettering on drawings be done with a lettering set and be planned to fit the proportion of the printed page. Lettering on the original should be large enough to be legible after reduction of the figure to single-column width. The difference in type size within a figure should be no more than approximately 15%. The caption of each axis should be lettered parallel to its axis. Background grids should not be included. For half-tone reproductions, glossy, high-contrast, black and white prints should be submitted. Each figure should be identified on the back with the author's name and figure number. Figures are to be cited in the text by consecutive Arabic numerals. Figure captions should be typed as a list on a separate page.

Equations. Equations should be typewritten or clearly handwritten with an Arabic number if necessary for reference placed in parentheses to the right of equation. Reference to equations should use the form "Eq. (3)."

Footnotes. Footnotes to the text should be indicated by consecutive superscript numbers and listed on a separate page at the end of the paper.

References. References should be cited in the text by consecutive underlined numbers in parentheses. The references must appear on a separate sheet, listed in numerical order, i.e., in accordance with order of citation in the text. After the reference number, the author's initials, last name, journal name, volume, initial page number, and year (in parentheses) should be listed in that order. Abbreviations for journal names should follow the style of *Chemical Abstracts Service Source Index,* 1980. For book references, give the author's name, name of book (in quotes), Editor's name (if any), edition (if other than the first), chapter or page number, publisher's name, place and year of publication.

Proofs. Unfolioed page proofs will be sent directly to the author from the printer together with order forms for reprints. There is no page charge.
